**Leon Blewett - Submission on the draft copyright Code of Practice for S92A**

I am unsure of exactly what you require but gather that as a "service provider" under this act you are responsible for "managing the law" on those who infringe the copyright laws covering both music and videos,

Music comes in numerous forms, one of which is sheet music so I assume sheet music also comes under this act.

I understand a basic principal of law is that it must be equal to and for all.

If downloading, thereby copying music becomes illegal, then equality would mean photocopying sheet music is illegal - and it is

If, as "providers of a service or vehicle" that enables people to copy (download), you are to administer this law on infringers, then should not the same law apply also to the suppliers / manufacturers of photocopiers?. After all they also "providers a service or vehicle" to infringe on copyrights.

All must be equal and unless this law is reviewed all is not equal
