**Frank May- Submission on the draft copyright Code of Practice for S92A**

To all at TCF

As a simple user of the internet with an interest in Copyright issues, you need to get your proposed draft of conduct written into law to be effective.

How you can do that might mean more than driving a tractor up the steps of parliament.

As you are going to run out of time, It also may mean that you should be telling government directly that Section 92A is unworkable and you are unable to comply with this part of the copyright law amendments from the 28<sup>th</sup> of February/

All ISPs should be carrying this same message to the politicians and their advisors.

Regards,

**Frank May**
